

Comprehensive security to meet the demands of the modern world.

Global solutions designed for today's applications

Interlogix offers comprehensive solutions that not only keep your customers more secure, but also keep them safe in a way that's effective, efficient and convenient. With a broad portfolio featuring advanced innovations, Interlogix offers products that are as intelligent as they are intuitive. Plus, Interlogix solutions are backed by premium service and support to help grow your business in the changing landscape of the security industry.

Commercial Solutions

You're in good company

Delivering customized commercial solutions to keep businesses safe and secure, Interlogix is your one-source provider to meet the unique security needs of modern companies. Our comprehensive portfolio of security products, including IP solutions, covers every aspect of intrusion detection, video surveillance and access control for commercial applications of all kinds. Ultimately, it's about ensuring small to mid-sized companies have everything they need to protect people, property and the bottom line.

Residential Solutions

Connected, protected and a whole lot more

Interlogix residential systems meet the security and lifestyle needs of today's families, with technology that's both intuitive and perfectly in sync with busy routines. Our customized, scalable solutions include wired or wireless function, remote management and offerings that integrate easily with multiple home systems including HVAC, lighting and more.

Working with the brands you know and trust

To address changing customer needs, we've integrated the latest innovations into a comprehensive portfolio of commercial and residential security solutions. Interlogix includes some of the most recognized names in the industry, and provides a progressive, proactive approach to cover all aspects of security and life safety.

Securing 100 miles of New York waterway takes TruVision[®].

With blazing summers, brutal winters and miles of saltwater in every direction, the New York City area represents the harshest of conditions.

Which is why NY Waterway and East River Ferry chose TruVision IP cameras and recorders to secure its fleet of ferries and over 100 miles of shoreline. Scalable, reliable and easy to use, TruVision video solutions protect 35,000 passengers every day with exceptional image quality and real-time data for 24/7 situational awareness.
